

TREKZ TITANIUM™

WIRELESS BONE CONDUCTION HEADPHONES 

AFTERSHOKZ®

DYNAMIC. PRECISE. BOUNDLESS.

Bone conduction isn't something we invented, but we've mastered the concept; and combined with our suite of proprietary audio technologies, have invented the ultimate sport headphone. **Trekz Titanium™** was inspired by the reimagination of the active lifestyle, wrapping powerful features in a functional design, ignoring the limits of traditional sport headphones.

Bone Conduction Technology

Bone conduction is a natural part of the hearing process, as sound already travels through our eardrums and bones simultaneously. Our patented transducers guide those mini vibrations through the cheekbones, directly to the inner ears.

PremiumPitch+™ Audio Experience

Bone conduction audio is seldom referred to as premium. Our **PremiumPitch+™** technology raises that bar, delivering dynamic range for music and crystal clear voice calls. This new standard is not only unmatched by competitive brands, but is indiscernible in comparison to traditional high end headphones and earbuds.

Safe + Comfortable

OpenFit™ is our promise of uncompromised situational awareness and extended comfort, in a revolutionary open ear design that won't inhibit ambient sounds because ears are never blocked or covered.

The Power of Titanium

The backbone of the industrial design is its titanium frame, an element chosen not only for its strength and durability, but also for its infinite flexibility, which will deliver maximum comfort and the very best sound.

Fit

- OpenFit™ design provides situational awareness and extended comfort
- Lightweight and flexible frame wraps behind head and curls over ears, and remains securely in place during activity

Durability

- Two-year warranty, with product registration
- Premium titanium frame ensures strength and infinite flexibility
- IP55 certified to repel sweat, moisture and dust

Compatibility

- Bluetooth v4.0
- Pair to any Bluetooth-enabled device (A2DP, AVRCP, HSP, HFP profiles)

What's in the box?

- Wireless headset
- Zippered storage case
- Universal micro-USB charging cable
- Pair of earplugs
- Multi-language user guide

Specifications

- Part number: AS600
- Weight: 1.27 oz (36g)

Sound

- PremiumPitch+™ technology guarantees superior stereo sound
- Dual noise canceling mics eliminate external noise and enhance speech
- EQ presets boost bass
- LeakSlayer™ technology eliminates natural sound leakage
- Speaker type: bone conduction transducers
- Frequency response: 20Hz~20KHz
- Sensitivity: 100 ± 3dB

Convenience

- Multifunction button provides complete control of music and calls right from the unit
- Audrey Says™ voice prompts guide through power, pair, play and talk
- Rechargeable lithium ion battery delivers 6 hours of continuous play (charges in 1.5 hours)
- Reliable connectivity within a wireless range of 33 ft (10m)

What colors does it come in?

- Ocean (Blue/Black)
- Ivy (Green/Black)
